

7. (New) A roll connector structure for a vehicle according to claim 5, wherein one portion of the at least one steering switch is formed integrally with the surface of a driver's side of the rotor side casing, and the other portion of the at least one steering switch is connected to the one portion of the at least one steering switch.—

**REMARKS**

Claims 1-4 are pending. By this Amendment claims 5-7 are added. The Examiner is further invited to contact Applicants' undersigned representative to discuss any aspects of this case. Examination on the merits is respectfully requested.

Respectfully submitted,

  
Thomas W. Cole  
Reg. No. 28,290
